Disinfectant Wipes

20,140
Hygiene/Care Kits

204,520
Food & PPE Boxes

Public & Private Sectors: lessons to be learned

- Ensuring that “essential services,” especially express delivery services, can continue operating
- Recognizing the critical role of air cargo services
- Harnessing ground cargo networks to prevent shortages or dislocations

Implementation of trade facilitation measures

Support for simplified clearance procedures (clearance procedures should be approached like a gateway, not a checkpoint)

Simplifying the collection of duties and taxes for low-value shipments

Leveraging technology to enhance risk management prior to arrival

Thank you!
